

OSHA 10-HOUR TRAINING PROGRAMS FOR General Industry

Program Description:

The 10-hour Outreach Program for General Industry is a series of safety courses which target the most commonly dealt with topics found in 29 CFR 1910. Employers and employees alike will benefit greatly from information provided in this program.

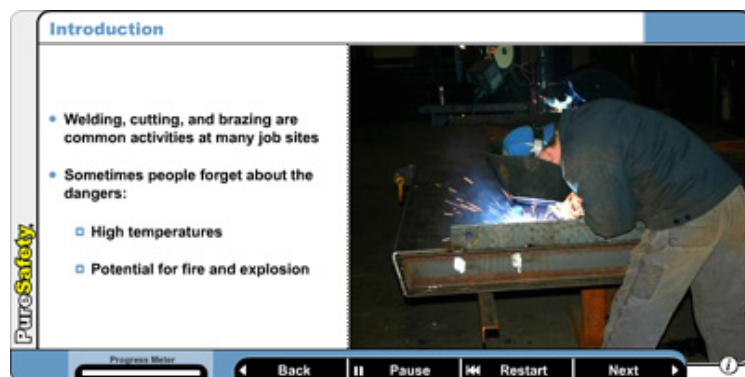

The program is ideal for newly hired employees to ensure that they are given a broad overview of the role that OSHA plays in the workplace as well as their own personal roles and responsibilities regarding safety. The curriculum has been approved by OSHA. Each student who successfully completes the program will receive a completion card issued by the U.S. Department of Labor.

Program Breakdown:

- Students have up to 6 months to complete the program.
- Quizzes are given at the end of each lesson. There are 13 lessons in the program.
- A final exam is given at the end of the entire program and students must score at least 70% or higher.
- A certificate is available for students to print immediately upon completion of the program.
- Printable Job Aides are available for you at the end of each lesson.

Topics Covered:

- Introduction to OSHA
- Electrical Safety
- Walking/Working Surfaces
- Egress, EAP & Fire Protection
- Introduction to Industrial Hygiene
- Hazard Communication
- Material Handling & Storage
- Ergonomics
- Confined Spaces
- Personal Protective Equipment (PPE)
- Welding, Cutting & Brazing
- Machine Guarding
- Hand and Power Tool Safety

Each PureSafety lesson includes intuitive navigation, relevant graphics and pertinent information to create the ultimate learning experience.

1. Is this the same 10-Hour training program that is offered in classrooms?

Absolutely! We have taken the criteria outlined by the Occupational Safety & Health Administration (OSHA) and developed interactive online courses that allow students to learn the same information that is usually provided in traditional classroom settings.

2. What are the differences between the two programs?

The General Industry Program is designed for those who work in trades which fall under the regulation found in 29 CFR 1910. Typical work activities can range from manufacturing operations to chemical processing to millwork. The Construction program is designed for those who “work for construction, alteration, and/or repair, including painting and decorating.” These individuals fall under the regulations found in 29 CFR 1926.

3. What are the benefits of earning a 10-hour completion card online?

Widely Recognized – Once your completion card has been produced, employers can confirm that students have taken part in a safety training program that is recognized by OSHA.

Flexible Scheduling – Online training allows students to progress through the series of lessons at their own pace. From the time students enroll, they will have six months in which to complete the program. Employers can easily navigate numerous employees through the program without the hassle of hiring and scheduling trainers.

Consistency – Everyone receives the same quality lessons, regardless of the time or location. Employers can provide the same baseline training for each of their employees.

4. Will I be tested?

Yes. At the end of each lesson, students receive a ten-question quiz. Students are required to score a minimum of 70% to proceed to the next lesson, and they are allowed three attempts to achieve a passing grade. A final exam of approximately 25 questions is given after the entire program has been completed and a minimum score of 70% must be achieved.

5. Can I view a lesson more than once?

Yes. If for instance a student was unable to pass a test on his/her first attempt, he/she can view the entire lesson again. Or, a student can view it again to simply improve his/her understanding of the subject.

6. How soon can I start?

Through our OSHA Training On Demand system, students can easily enroll online and select the method of payment in a matter of minutes.

7. How soon can I get my card?

Immediately after successfully finishing the 10-hr program, students will be able to print a certificate that indicates successful completion of the program. The completion card will be mailed within 2-4 weeks.

8. What if I have any questions while taking the course?

Each student will be provided with two important contact numbers. The first is a customer service representative who can help with problems relating to a computer interfacing with the program. The second number will connect them with one of our “trainers” or “subject matter experts” who can clarify any questions relating to the lessons.

9. Will this course teach me everything that I am required to know regarding occupational safety?

No it will not. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers. Workers must receive additional training, when required by OSHA standards, on the specific hazards of their job.
