

Helping You to Maximize LSMS

PureSafety understands that an effective safety program depends on your ability to successfully administer materials and monitor your trainees' progress. To help you maximize the powerful features of our solutions as you integrate them into your existing processes, PureSafety offers a variety of comprehensive training options.

New Implementation Training

Our experienced, serviced-focused implementation professionals will consult with you during the onboarding process to create a customized set-up that incorporates your existing workflow.

Onsite and In-House

- Recommended large or multifaceted organizational structures with complex assignment-making needs
- Available at your location or PureSafety's headquarters
- Additional time can be added for organizations who have licensed add-ons

Online

- Delivered as a series of online sessions
- Designed to provide wide variety of users with a basic understanding of functions
- Ideal for organizations with users in multiple locations

Refresher Training

Our team is available to design customized sessions specifically for your needs. This advanced training coverage is geared toward users who have experience as LSMS Administrators and can be provided at your location, PureSafety's headquarters or online.

Administrator Certification

This multi-session, multi-format training begins with training at either your location or PureSafety's headquarters and is paired with offline assessment workbooks, offline training sessions, and a final exam that qualifies you to become a Certified LSMS Administrator. Both current and new administrators make excellent candidates for this certification.
