

# RESULTS-DRIVEN OCCUPATIONAL HEALTH MANAGEMENT SOFTWARE

PureSafety's Occupational Health Manager (OHM) is the industry's most effective and trusted software solution for occupational health, safety and medical professionals. Anchored by our diverse, in-house health, safety and risk management experts and dedicated service professionals who have completed thousands of successful implementations, OHM gives you more of the powerful, easy-to-use tools you need to streamline tasks, reduce costs, and keep your people healthy, safe and on the job.

OHM helps thousands of customers, from small occupational health clinics to Fortune 500 companies, increase efficiency and productivity, better analyze and report data, reduce workplace injuries and illnesses, and improve awareness of critical health and safety issues.

## Powerful Software for Workflow Efficiency

**Medical management** features, including medical surveillance and powerful benchmarking features, enable you to maximize safety and compliance.

**Case and claims management** capabilities, including integrated Official Disability Guidelines (ODG), allow you to monitor occupational and non-occupational cases efficiently and reduce the total cost of employee absences.

## Key Features Include:

- One-click electronic health records
- Easy-to-use data entry and search tools to streamline workflow
- Industry-leading tracking and analysis tools, including customizable dashboards and off-the-shelf reports
- Flexible configurations to fit nearly any environment, workflow or budget
- Innovative scanning and photo capture capabilities for paperless charts functionality
- Efficient information sharing throughout an organization
- Secure, reliable web-based software to reduce costs and reliance on IT

# OCCUPATIONAL HEALTH MANAGER

**Clinic management** functionalities, including sales revenue/outcome analysis, empower you to effectively deliver and track clinical services while boosting profitability.

**Safety management** tools, including OSHA 300, 300A and 301 reports, help you keep your people safe and streamline data sharing between safety and medical professionals.

**Health and Wellness** tools to ensure the success of employee health and wellness programs, including fitness evaluations, back health and stress testing.

**Immunizations and vaccinations features** include a complete at-a-glance immunization compliance screen, population and individual reports and statistics, the ability to track past results and tools for batch vaccinations and PPD, with automated consent for tracking.

**Compliance reporting tools enable you to easily** determine what is OSHA recordable, keep appropriate logs electronically, and print what you need when you need it. You'll spend less time on paperwork – and be more confident that you're compliant.

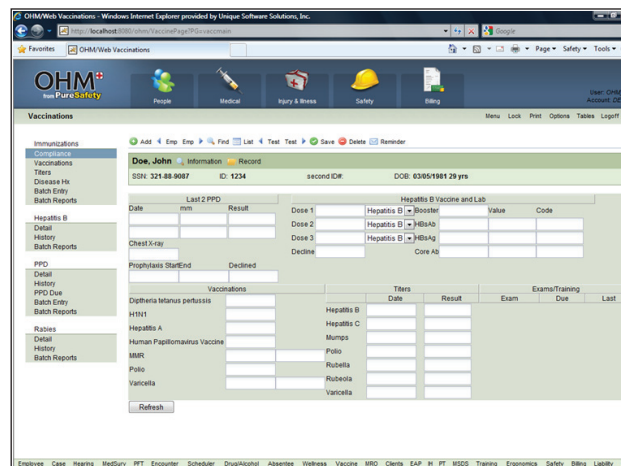

## Reliable, Secure Web-Based Delivery

PureSafety's web-based solutions enable us to deliver more functionality – and get it to you faster. Superior web-based technology offers considerable advantages, including 24/7 remote access, automatic email notification, fast updates and lower total cost of ownership when compared to similar installed solutions.

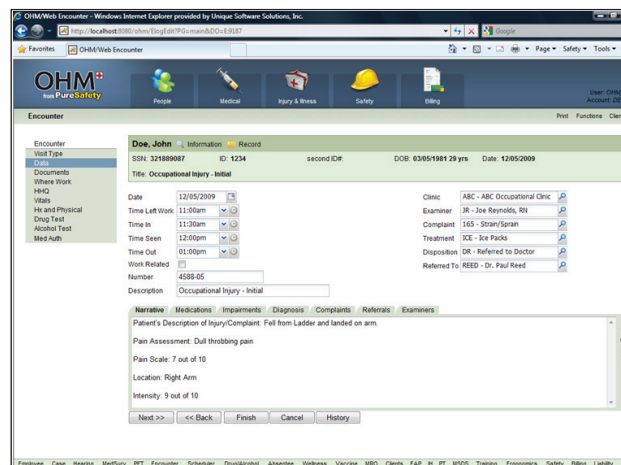

## Safety & Training Management

OHM now includes connectivity with PureSafety's industry-leading Learning and Safety Management System – offering a true end-to-end solution for workforce health and safety. This creates an unmatched total solution that delivers convenience and bottom-line benefits across the entire enterprise.
