Innovative Occupational Health
Management Software Solution

PureSafety[®]

Health & Safety Software Solutions

Experience the Power of Employee Health and Safety Software

No system does more to streamline tasks, reduce costs and keep your people healthy, safe and on the job.

PureSafety is committed to help you protect your greatest assets: your people and profits. Our innovative, web-based software and information solutions include Occupational Health Manager® (OHM®), the industry's most comprehensive solution for occupational health, medical management and safety. PureSafety's tools manage the entire lifecycle of workplace health and safety. Our software can help you consolidate point solutions, improve workflow and integrate data to enhance business intelligence and cost savings.

The launch of OHM in 1986 revolutionized occupational health management, and it's been expanding and improving ever since with feedback from professionals like you. Combining OHM with PureSafety's innovative Learning and Safety Management System (LSMS) and online training developed specifically for healthcare environments creates a total solution that delivers unmatched convenience and business benefits. And, our solutions are backed by our certified occupational health professionals, safety and risk management experts and dedicated service professionals who have completed thousands of successful implementations. Bottom line? You get more of the powerful, easy-to-use tools you need to streamline tasks, reduce costs and keep your people healthy, safe and on the job.

Thousands of customers, including hospitals and clinics, use OHM to increase efficiency, compliance and productivity, better analyze and report data, reduce workplace injuries and illnesses, and improve awareness of health and safety issues.

KEY FEATURES INCLUDE:

- Highly intuitive user interface and navigation
- Vaccination and immunization batch management, including flu shots
- Medical surveillance with automated scheduling and integration with your HRIS
- Easy-to-use data entry and search tools to streamline workflow
- Industry-leading tracking and analysis tools, including customizable dashboards
- Off-the-shelf reports, easily exportable to Excel
- Innovative scanning and photo capture capabilities for truly paperless charts
- Flexible configurations to fit nearly any environment, workflow or budget
- Secure web-based software to simplify IT maintenance and reduce costs

Powerful Solutions for Workforce Health & Safety

PureSafety's innovative, web-based software and information solutions support and enhance workforce health and safety programs in critical areas, including:

- **Compliance** — simplified regulatory reporting (OSHA, MSHA, JCAHO, DOT, EPA and more)
- **Risk Management** — improved risk identification, analysis and response
- **Governance** — better corporate accountability and transparency
- **Culture** — greater appreciation of safety and health programs and their impact

As a result, our customers consistently improve business performance, including reduced costs and increased productivity. That's why thousands of companies in more than 20 major industries, including 35% of the Fortune 100 as well as hospitals and clinics, trust PureSafety's suite of software and information solutions for workforce health and safety.

PURESAFETY'S SUCCESS IS MEASURED BY YOUR RESULTS:

Carolinas Healthcare, the nation's third-largest non-profit public healthcare system, **saved hundreds of man-hours** by automating TB skin test surveillances.

Manitowoc Cranes, one of the world's largest providers of lifting equipment for the global construction industry, **cut 20 to 30 minutes off the time required** to complete each Pulmonary Function Test and OSHA 300 log.

SwedishAmerican, a regional healthcare leader, uses OHM's powerful tracking tools to **measure and report on the money saved** by using its Employee Health Services department rather than outside clinics.

The Industry's Best Tracking, Analysis and

From scheduling appointments to tracking and reporting critical data, OHM gives you the powerful, easy-to-use tools that you need. With OHM, you can efficiently create and manage medical surveillance, vaccination, hearing conservation, health and wellness programs and more.

Medical Surveillance

OHM makes it easy to monitor and maintain compliance in healthcare environments. Easy-to-use and intuitive tools help you do everything from monitoring screenings and exams to collecting data and complying with complex internal and regulatory demands. OHM enhances efficiency, accuracy and accountability as you manage day-to-day medical surveillances.

Health and Wellness

OHM offers comprehensive, highly effective tools to ensure the success of employee health and wellness programs, including fitness evaluations, back health and stress testing.

Immunizations and Vaccinations

OHM will help you keep accurate immunization records and easily transfer relevant information to other functions of our integrated software solution, including automated reporting. This module's powerful features include a complete at-a-glance immunization compliance screen, population and individual reports and statistics, the ability to track past results and tools for batch vaccinations and PPD, with automated consent for tracking.

OHM's case and claims management tools empower you to reduce the total cost of employee absences. Powerful features help improve monitoring and management of injuries and illnesses, including both occupational and non-occupational disability cases, as well as absentee management and return-to-work programs.

Case and Claims Management

OHM assists in managing workers' compensation and disability claims, including short-term disability, long-term disability, PTO and FMLA. Employers using third-party administrators or insurance carriers for payment processing will find tools for notes, tasks and return-to-work programs, and everything they need to efficiently import and reconcile cost data. OHM makes it easy to track lost/restricted workdays, job restrictions, treatment plans, case awards and payments, return-to-work metrics and more.

Bloodborne Pathogens and Sharps

OHM makes it easy to maintain the OSHA Sharps Injury Log per 1910.1930 Bloodborne Pathogens standard. In addition to body fluid exposure count reports, OHM includes tools to document needle sticks and automatically enroll employees into surveillances based on source patient status.

“PureSafety's OHM solution and friendly, supportive staff help with record keeping to an electronic health record, giving us a far better data. The database and wonderful, easy-to-use tools have improved workplace stress. Just as importantly, PureSafety solutions enable us to provide information to our customers.”

Occupational Health Manager

and Reporting Tools — at Your Fingertips

OHM's safety management features are so comprehensive and robust that it's like adding multiple employees to your team. From investigations and OSHA reporting to corrective actions, industrial hygiene and ergonomics, OHM's tools help you keep your people safe, healthy and on the job.

Injury Prevention

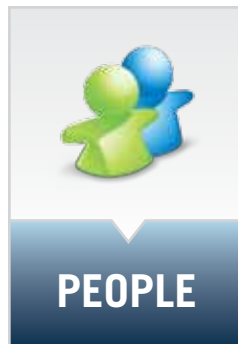

OHM offers tools to help with injury prevention by empowering executives with the most accurate, up-to-date information, while helping end-users to be more productive and keep their people healthy, safe and on the job.

Accident Investigation and Corrective Actions

OHM includes powerful tools to help track incidents, monitor unsafe conditions, actions and near misses, as well as assign and manage corrective actions. If an accident warrants work restrictions, OHM helps you place employees in suitable jobs.

Compliance Reporting

OHM simplifies regulatory reporting by helping determine what is OSHA recordable, keeping appropriate logs electronically, and allowing you to print what you need when you need it. You'll spend less time on paperwork — and be more confident that you're compliant.

Feel empowered with “one-click” access to your comprehensive electronic health records in one secure location. So easy to navigate and search, you quickly find employee data with our Rapid Record Search™ technology, providing distributed access to information like drug and alcohol test results, medical and respirator clearances and much more.

Electronic Health Records (EHRs)

OHM's EHR system saves time and money, ensures accuracy and simplifies information sharing. Blood type, medications, medical conditions, patient history and more can be accessed with the click of a mouse. Easily updated and highly portable, EHRs minimize the risk of patients forgetting about critical information on a form or during a visit. Everyone can see all the pieces of a patient's medical puzzle in one convenient, reliable record.

Demographics

OHM not only simplifies data entry, it also makes it easier to access and manipulate data for reporting and analysis. And, with the ability to integrate with HRIS systems, you can streamline how you share employee data, which means the information you need is always at your fingertips.

Training

OHM delivers the tools you need to satisfy compliance requirements, change behaviors, prevent injuries and most importantly, save lives. OHM's comprehensive training capabilities help you simplify and centralize training management and reporting.
