

COMPREHENSIVE SOFTWARE FOR CLINIC AND PRACTICE MANAGEMENT

PureSafety's SYSTOC® is a powerful information management software solution for occupational medicine, urgent care and rehabilitation. For more than three decades, SYSTOC software has been a pioneering force in providing efficient, effective solutions to the health care provider marketplace by:

- Supporting delivery of efficient, high-quality patient services
- Creating, storing and retrieving electronic medical records
- Providing comprehensive documentation capabilities for providers and therapists
- Automating labor-intensive, paper-based processes

SYSTOC technology is a powerful tool to help your clinic:

- Create, store and easily retrieve electronic medical records with rapid access to patient data
- Convert your existing paper forms to Portable Document Format (PDF)
- Scan and attach outside documentation and reports electronically
- Automatically route electronic forms to appropriate staff
- Monitor patient location and status during the visit
- Batch and securely email or fax reports
- Create transcribed medical records quickly with **tap2chart**® technology
- Sign records electronically
- Bill electronically with supporting documentation
- Interactively manage insurance authorizations

Key Features Include:

- Manage practice workflow and billing processes quickly and easily
- Create detailed, company-specific procedures
- Tie patient scheduling to company profiles
- Automate random drug testing selections
- Provide comprehensive reports to client companies and clinic management
- Track and manage injuries and exposures
- Monitor employee health
