

Helping You to Maximize SYSTOC

PureSafety understands that the value of our solutions depends on your ability to leverage their powerful features. To help you maximize the value of our innovative software solutions and integrate them with existing processes, PureSafety provides comprehensive training services.

New Client Training

Our experienced, service-focused professionals will guide you through every step of using SYSTOC – customized to your specific workflow.

- Customized step-by-step online configuration training to ensure SYSTOC meets the needs of your program
- 3-day user training – Focused on the clinic staff who will use SYSTOC in their daily workflow
- Additional day for those customers that intend to use SYSTOC as an EHR – Focused on tap2chart configuration and template building
- Additional days onsite to support your staff as you go live with SYSTOC

Classroom Training

You asked for it and it's back! Train without distraction at the PureSafety headquarters in Franklin, TN. Offered monthly, these targeted classes are available through either a four-day session or two-and-a-half day session.

- Billing Super User – Hands on training for all aspects of billing, including charge posting, receipts and adjustments, bill processing, end-of-month process and financial reports
- SYSTOC Super User – Provides with you the tools to become the SYSTOC super user for your program
- Progressing to and Implementing SYSTOC as an EMR – Topics covered include decision making, file building, forms review and customization as well as implementation and staff training
- tap2chart – Teaches users how to create designs for the various types of visits using data sequences, form management and other customization features as well as template building to help meeting the coding requirements for billing purposes

Refresher Training and Other Services

- 2-day annual refresher training - Ensure your staff knows all the tips and tricks, new features and functions, and a brush up of existing features and functions to utilize SYSTOC to its full potential and increase your ROI.
- SYSTOC tune up - Over time background data becomes messy and can slow the efficiency of your program. Let our experience professionals take a look under the hood, make recommendations and assist with the clean up to keep SYSTOC purring like a kitten.
- EMR migration – Implementing an electronic medical record can be a complex and intimidating process. A SYSTOC Implementation Specialist provides a utilization review and assessment, works you and your staff on additional file building and forms review, then provides staff training onsite.
