

Occupational Health Manager Safety Manager Module

OHM's Safety Manager module provides all the management, recording and analysis features you need to keep your people safe, healthy and on the job, while reducing total costs. Add Safety Manager to your OHM solution to expand your ability to streamline safety processes and reduce workplace injuries and illnesses.

Unmatched Efficiency and Bottom-Line Business Benefits:

- One-click electronic health records
- Standardize safety management processes so all areas of your organization operate in a consistent, repeatable manner
- Enhance incident investigation processes to quickly identify unsafe situations and take corrective action
- Simplify data entry and improve accuracy
- Streamline information-sharing between supervisors, safety professionals, and medical staff
- Drive accountability throughout your safety program
- Automate compliance reporting
- Improve job site safety and employee productivity

OHM's safety management tools are so comprehensive and robust that it's like adding new employees to your team.

Unmatched Safety Capabilities at Your Fingertips

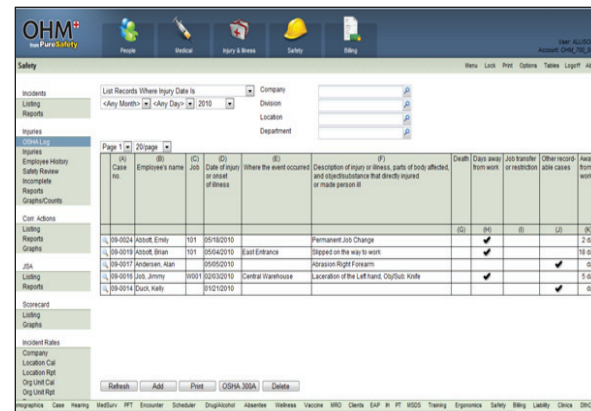

- Track and report incidents, near misses, unsafe actions or conditions
- Conduct detailed accident investigations
- Determine OSHA recordability of workplace injuries and generate OSHA 300, 300A, and 301A logs
- Analyze root causes and causal factors that lead to workplace injuries
- Use safety data to identify safety hotspots that lead to workplace injuries
- Assign and manage corrective actions
- Manage your fleet with comprehensive motor vehicle tracking
- Create a Job Safety Analysis (JSA) to record specific descriptions about how to perform a job-related task, including any associated hazards and suggested controls
- Help place employees in jobs suitable to their work restrictions
- Report on key safety metrics and trends
- Enhance accountability and ensure timely, accurate completion of accident reports with automated email notifications

Electronic File Attachments

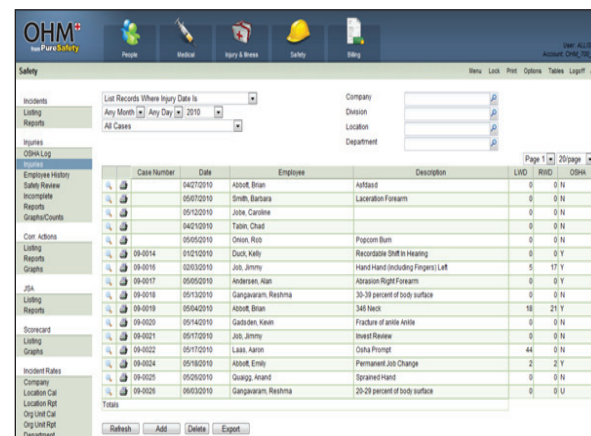

When it comes to accident investigation and reporting, a picture – or video clip – is worth a thousand words. With Safety Manager, a couple clicks is all it takes to attach any electronic file, enhancing the quality of your investigation.

Customizable Safety Scorecards

Easily customizable based on your industry and organization, OHM's safety scorecards greatly support in facility audits. You decide what needs to be audited, then follow the easy online template, checking the appropriate selections and answering relevant yes/no questions. OHM automates the rest, which can include e-notification capabilities, corrective action data, and more.

Easily track and manage incidents by date, location, injury type, near misses and much more.

Quickly determine OSHA recordability and generate OSHA 300, 300A and 301A logs with a simple mouse click.

More Dashboard Power To Keep People Safe, Healthy and On the Job

When asked what makes OHM's Safety Manager more valuable than similar solutions, many clients put powerful dashboard functionality at the top of the list. Safety Manager allows you to view up to four dashboard graphs at once in the core areas of safety, injury/illness, corrective actions, and causal factors. This feature also allows you to make year-to-year and other comparisons quickly. Powerful and flexible, the Safety Manager dashboards can be configured instantly to show the information that is most important to you and your organization.
